PARTNERSHIP

# District Licensing Developer Seminar

**MONDAY 3<sup>rd</sup> DECEMBER**  
**CAPABILITY HOUSE, SILSOE**  
**11:00 – 13:00**

Join us in the conference room at **Capability House, Wrest Park, Silsoe** for a developer-specific presentation on the South Midlands great crested newt district licensing scheme. We will provide an overview, an update on progress, real case studies and an opportunity to discuss how the scheme could benefit your projects.

Previous seminars have been open to developers and ecologists alike, which has led to a broad approach, highlighting scheme benefits from different angles at different levels of detail. This developer-specific seminar will focus on the benefits to development projects, rather than detailed habitat creation and conservation factors.

The session is free, CPD relevant and will begin with drinks and pastries before the presentation and Q&A. After the presentation, the NatureSpace team will stay to discuss specific projects and offer one-to-one advice, should you wish. Due to the development focus, this session would also be relevant for architects, project managers and planning specialists.

**The attend the session and learn how you can save time, save money and save newts, please RSVP [here](#).**
