Newt licensing made easy

All your rail needs covered under one
simple, quick licence

There's a better way to deal with newts

Newt licensing can be slow, complex, and expensive - but by using Network Rail's newt scheme, rail-related projects can stay on track while directly funding better conservation

INSTANTLY ASSESS IMPACTS

No need for newt surveys
- instead newt risk can be
scoped in/out instantly
using Impact Risk Zone
maps covering most of the
rail network

NO SURPRISE COSTS

Each application is
assessed individually and
fees are simple, fair and
proportionate to the
potential level of risk and
impact to newts

GET COVERED WITHIN 10 DAYS

Network Rail and
subcontractors can access
the Licence on a project-
by-project basis, year-
round - reducing delays

WE HANDLE THE HABITAT

Our newt experts deliver
long-term habitat off-site -
so minimal mitigation on-
site and no ongoing
commitments
